Introduce

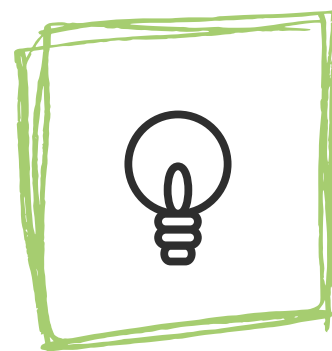

- "Healthy Family" - a convenient mobile application developed to manage family health.
- Healthy Family is a health application that allows you to track and manage your daily health schedule, and provide effective health advice. With a user-friendly interface, Healthy Family provides many useful features to help you monitor your health effectively. The application is based on the user's health status so it is highly accurate.

Nhóm 8

Value

Quality

Committed to providing high quality products and services that meet customer requirements and expectations.

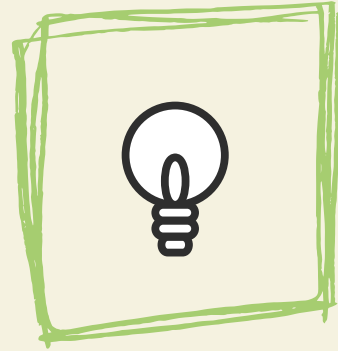

Dedication

Always put customers first, listen and dedicatedly serve customers to meet their needs and create the highest satisfaction.

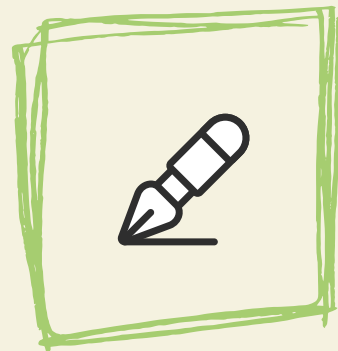

Integrity

Always adhere to the principles of honesty and transparency in business, not reducing the reputation and trust of customers.

Customer-oriented.

Always focus on customers' needs and desires to provide the best products and services.

Solidarity.

Build a working environment of cooperation, solidarity, and consensus to achieve the company's common goals.

Health information management

Target

Solve a problem

App products are often created to solve a specific problem or meet a user need. The goal is to provide an efficient and convenient solution to that problem.

Enhance user experience

An important goal of an application product is to improve user experience. This can include a friendly user interface, ease of use, good speed and performance, and providing a memorable and comfortable interactive experience for the user.

Increase productivity and efficiency

The goal of many application products is to help users look up and find information more effectively. This can be achieved by providing information and features to manage schedules, reminders, and other features to support users.

Create value and satisfy customers

Application products need to create value for users and meet customer expectations. The goal is to provide user satisfaction and create a positive experience, leading to customer trust and loyalty.

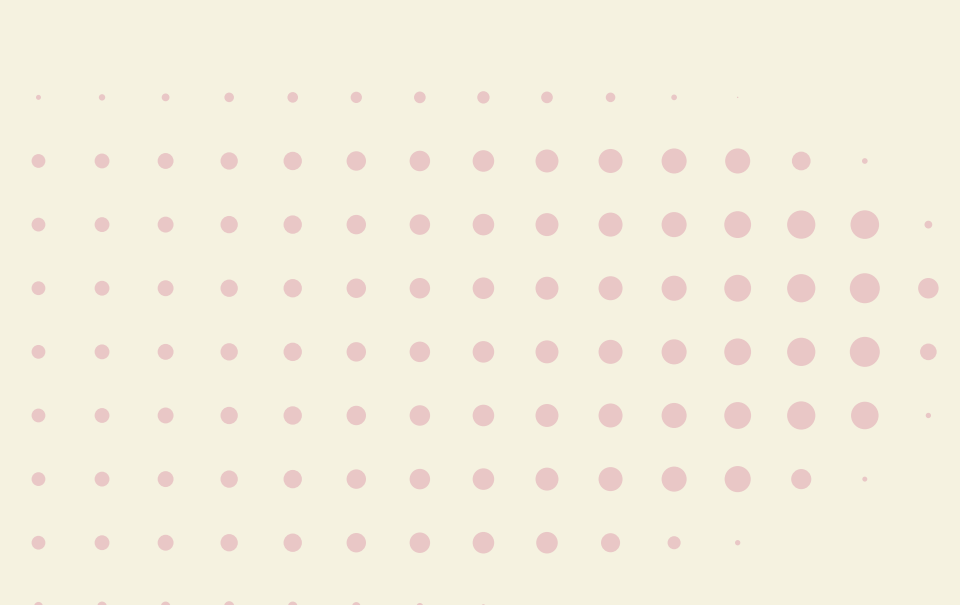

Function

- Activity tracking: The application can track users' daily activities, including health history, medical history, etc. It helps users maintain a healthy lifestyle.
- Health monitoring: Some health applications allow users to monitor and manage their health. They can provide information about the time of the examination, and the results are based on measurement data from sensors or through analysis of user samples.
- Consulting: Health applications can help users monitor and provide information about medical records. It can suggest where to see a specialist and provide information about specialists so users can best achieve their health goals.
- Reminders and scheduling: Health apps can provide reminders and schedules to help users monitor personal or family health to maintain daily health.
- Symptom tracking and notes: Health app allows users to record medical symptoms and track them over time. This can help users track symptom progression and share this information with their doctor or health professional.

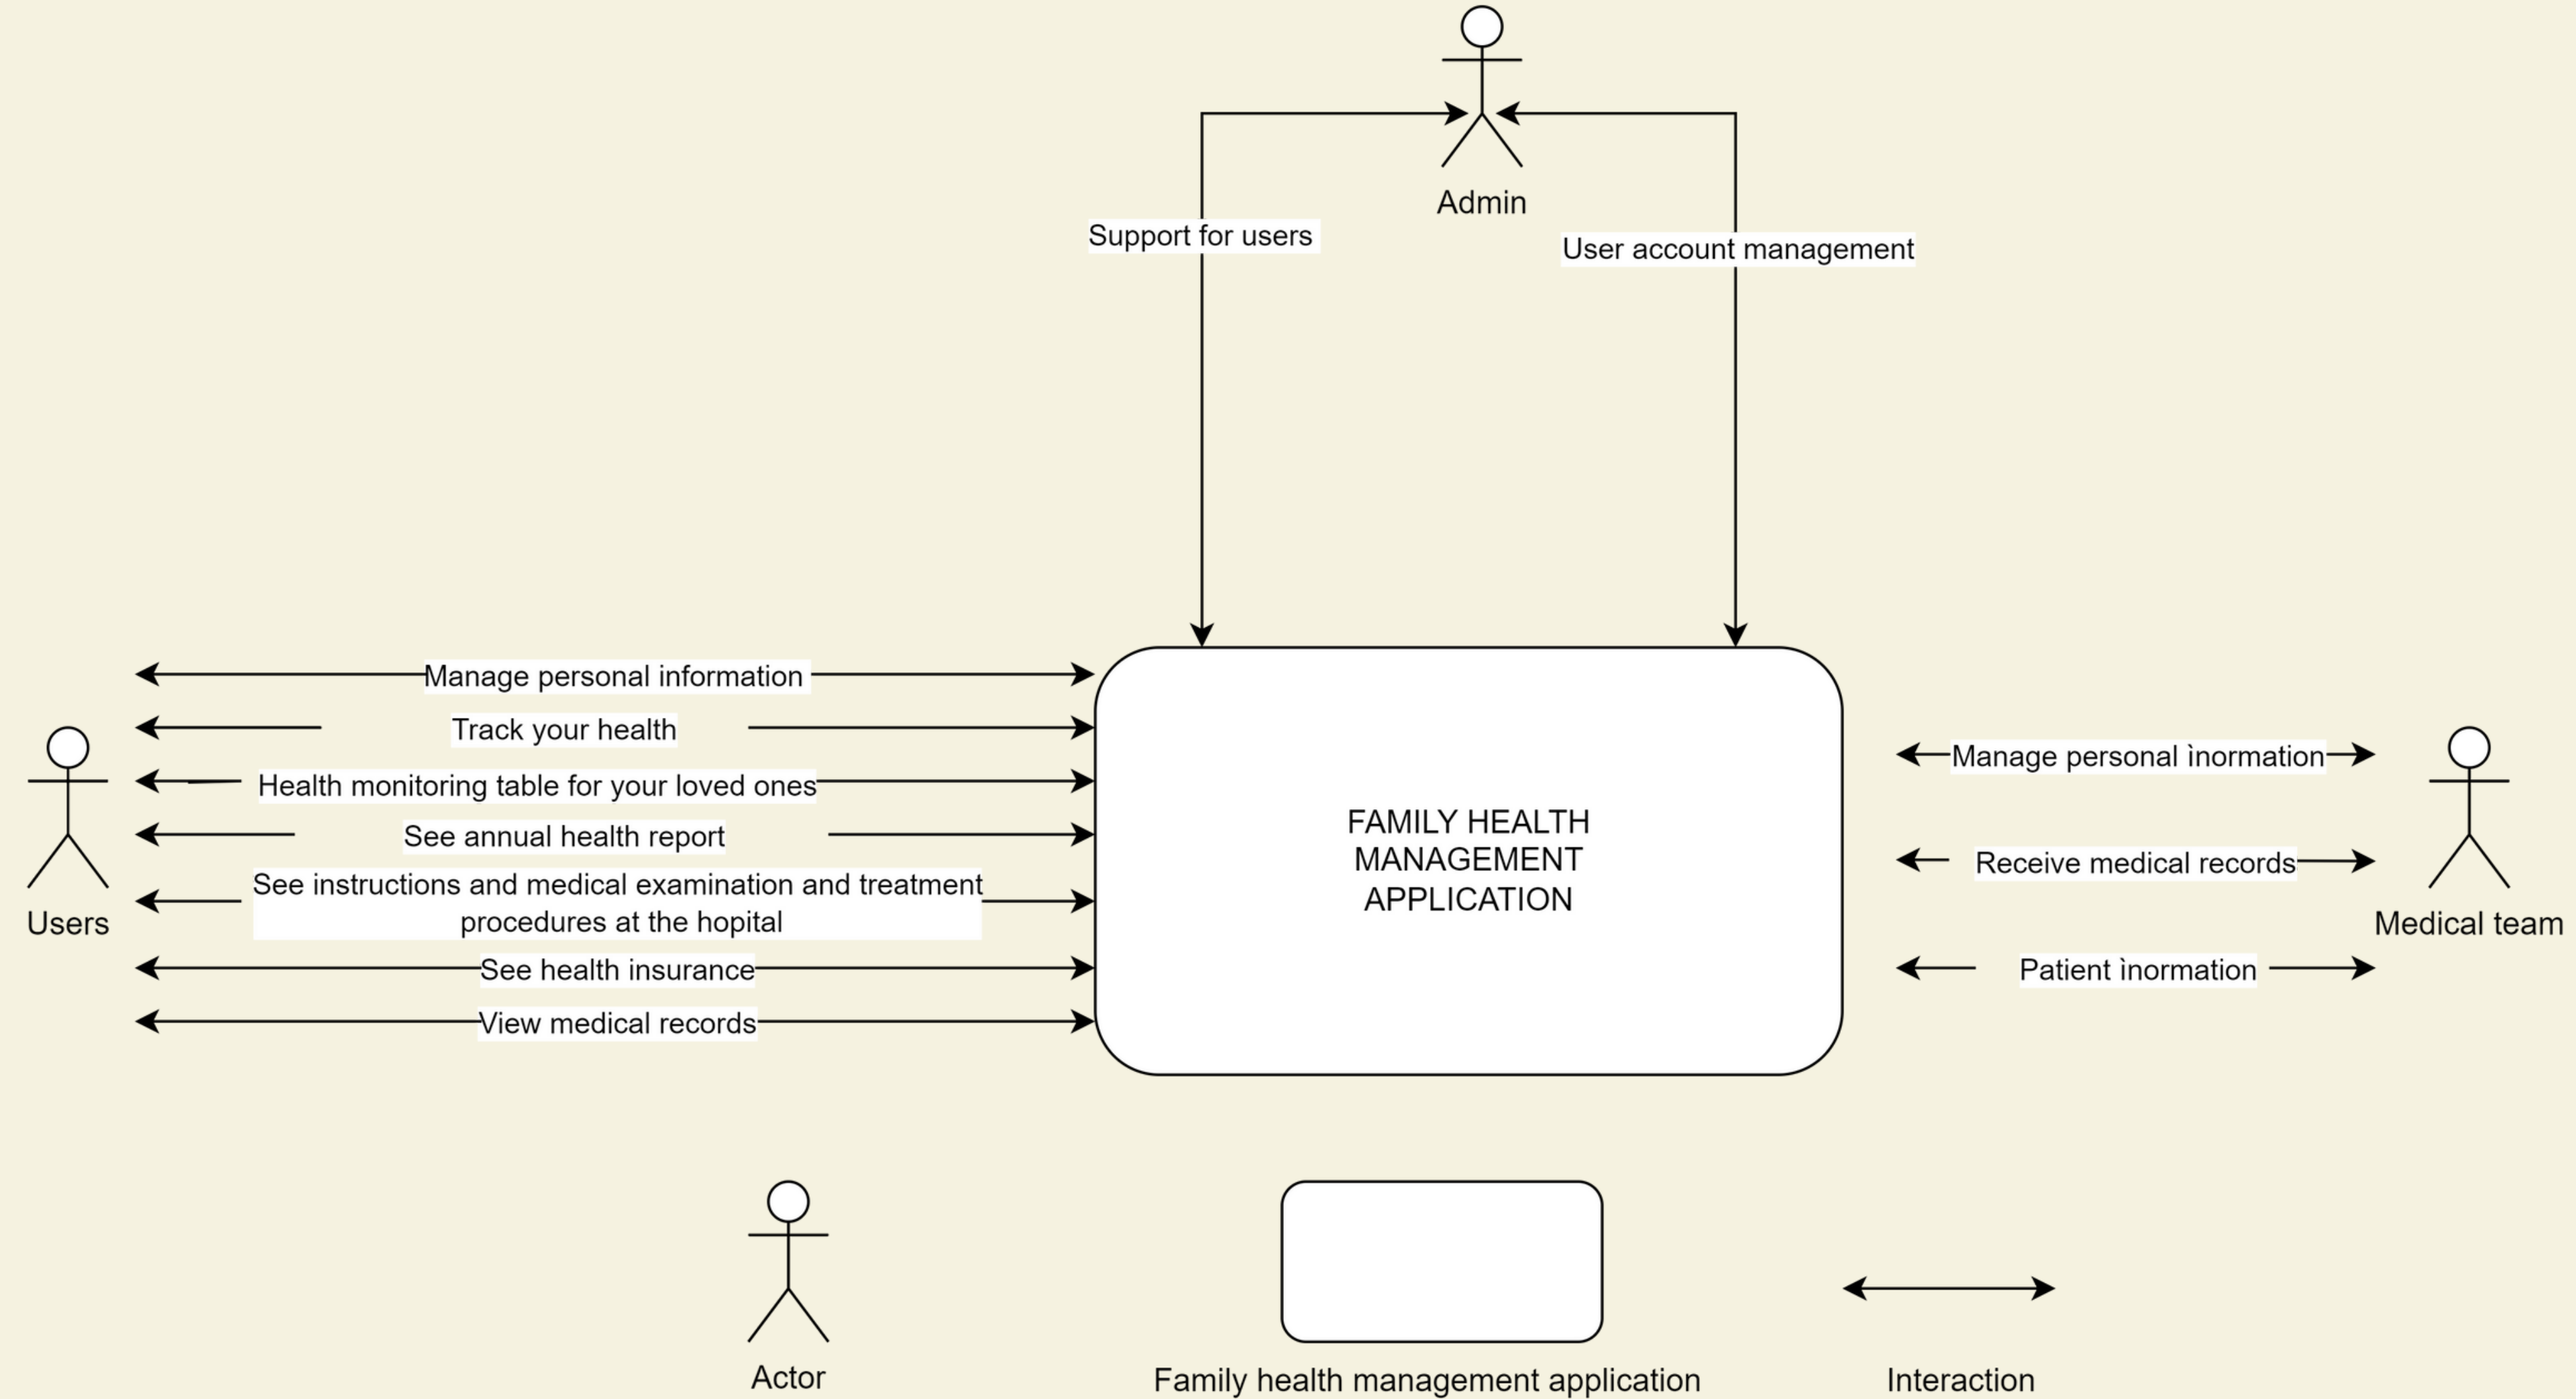

Note

That health apps can have diverse features and functionality, and some apps may offer additional services such as online consultations from doctors or medical professionals. However, using a health app should not be a substitute for seeking professional medical care when needed.

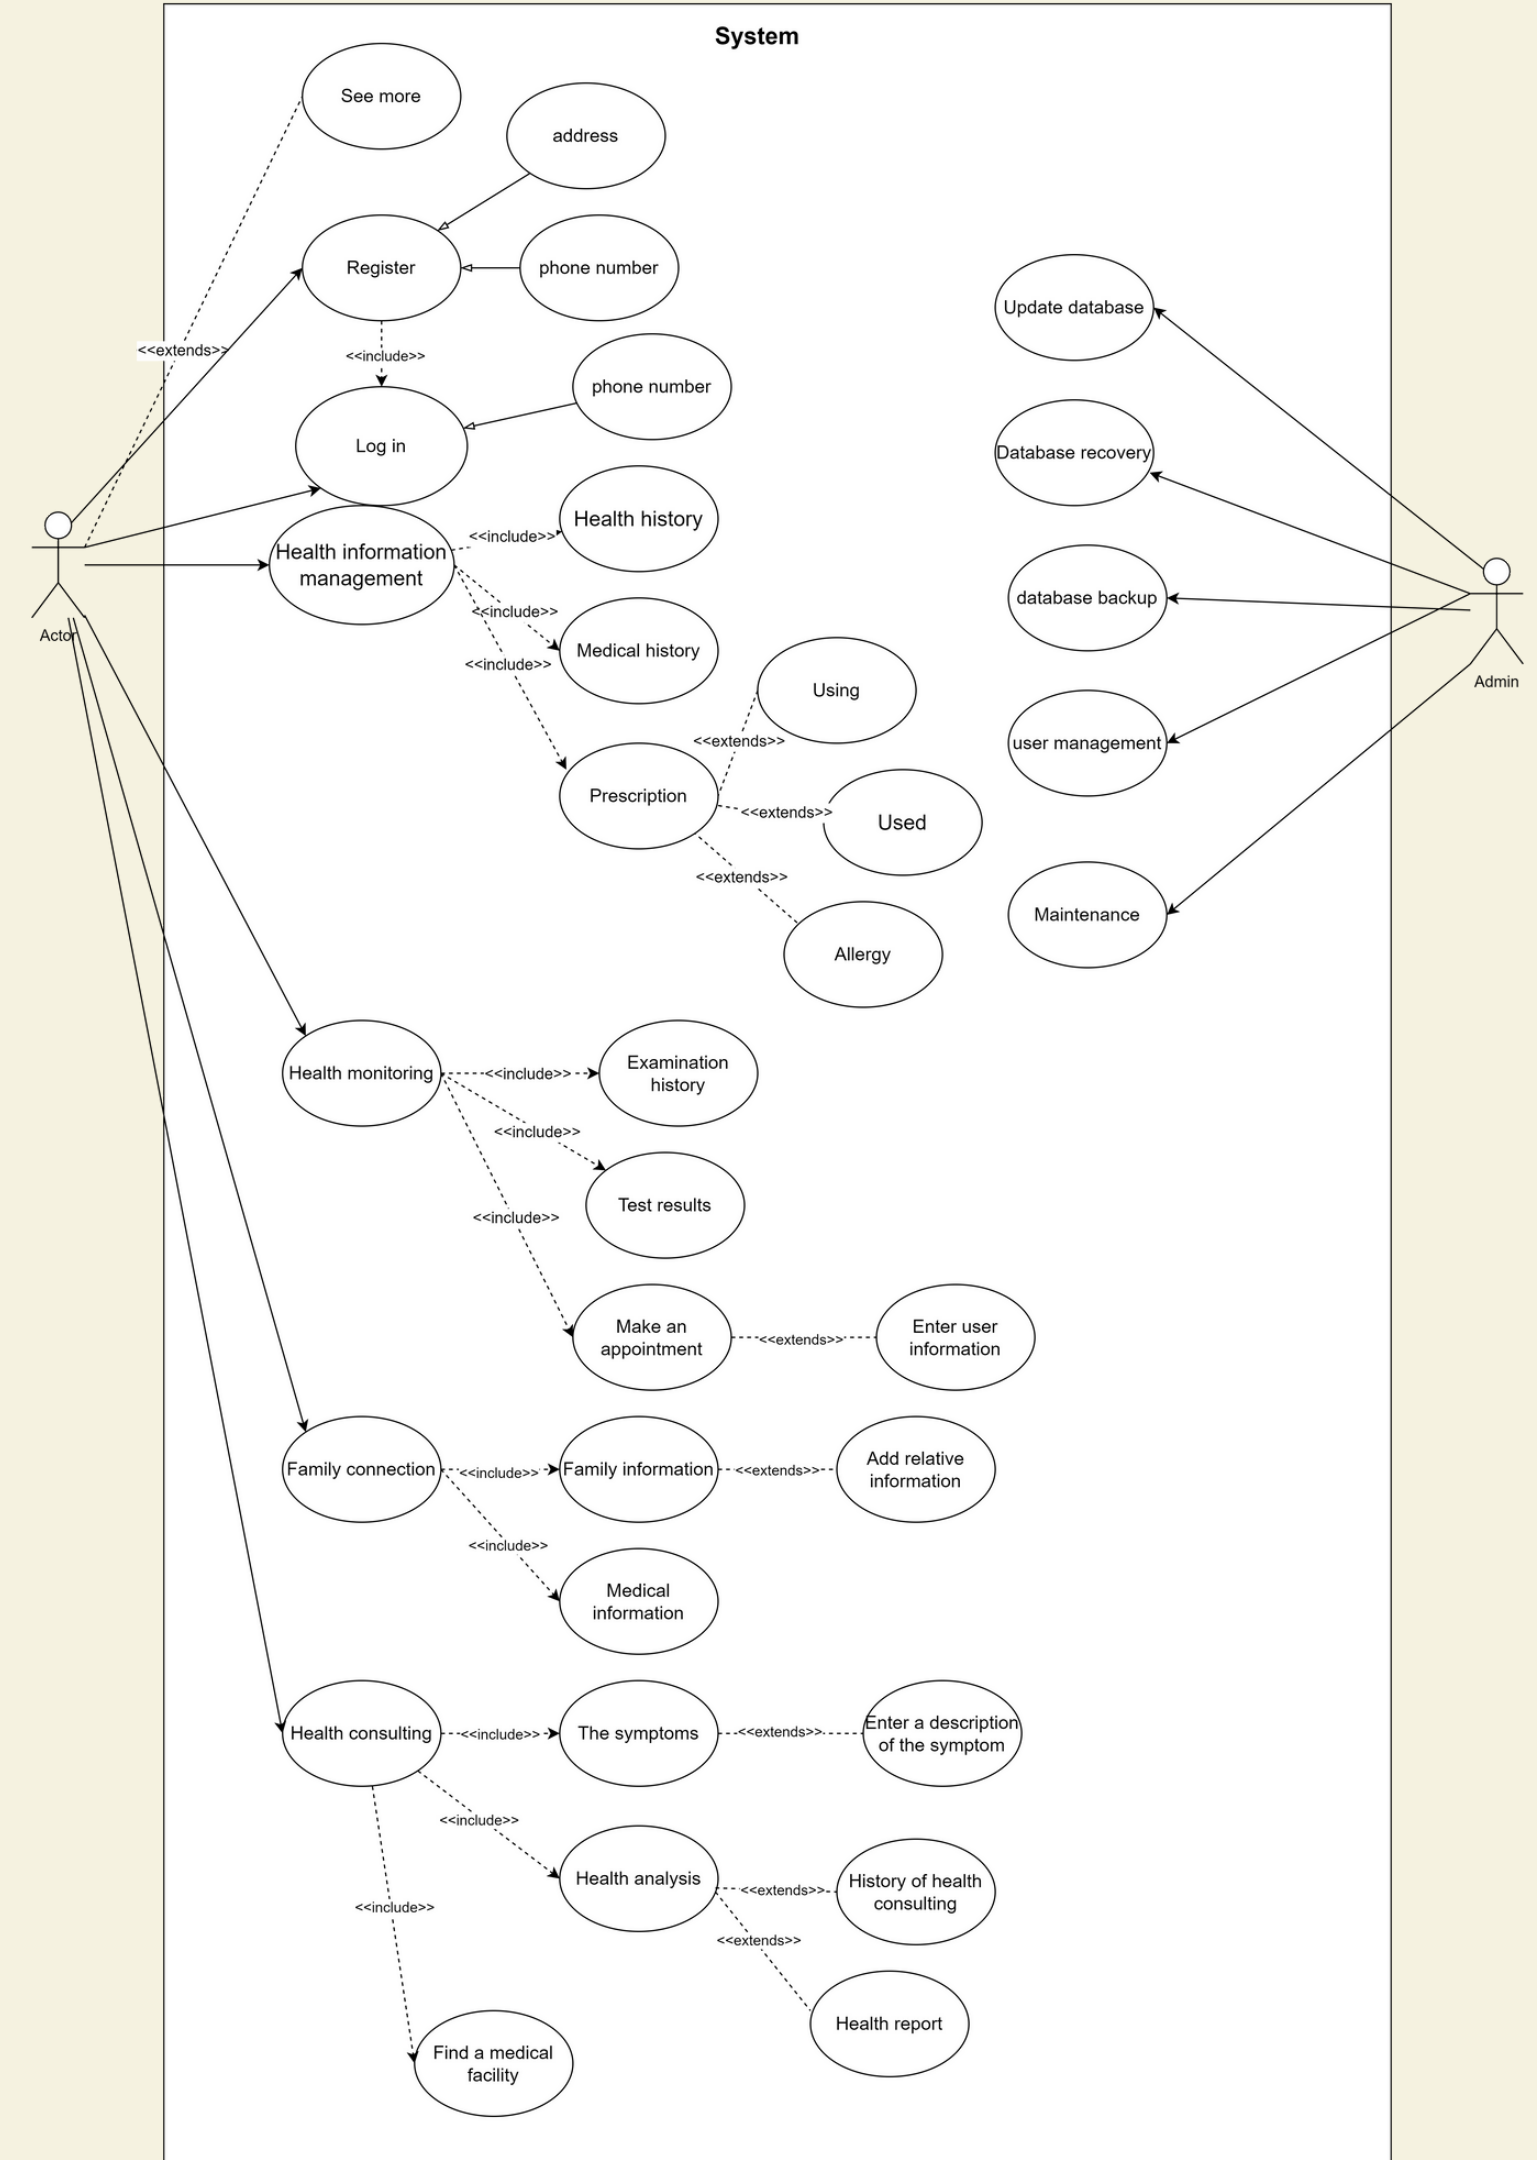

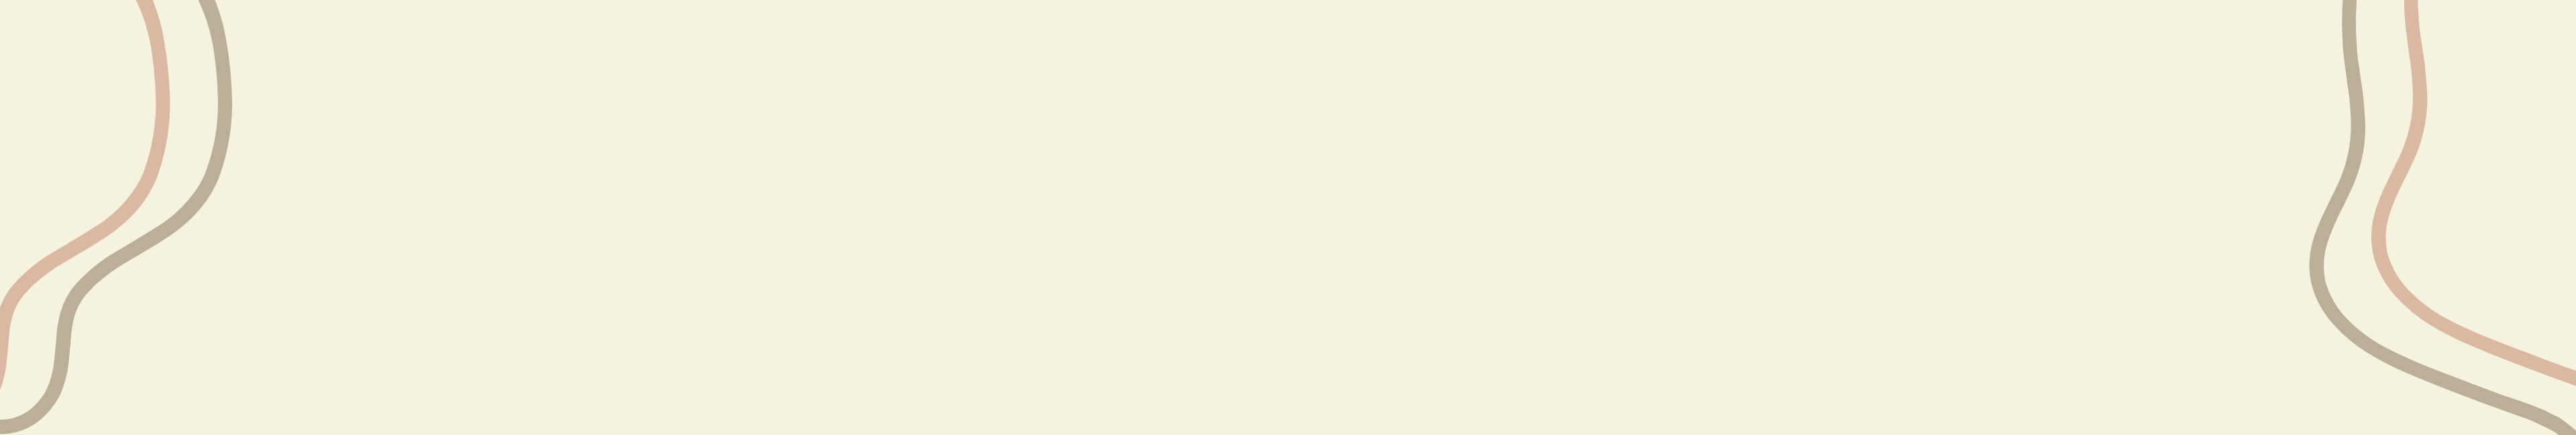

NON-FUNCTIONAL

- Efficiency
 - Usability
 - Get help
 - Scalability
 - Interoperability
 - Reliability
 - Maintainability
 - Serviceability
 - Confidentiality
 - Regulation
 - Manageability
- 

Use case

The top corners of the image feature decorative wavy lines in shades of brown and tan. The central text is set against a light pink, irregularly shaped background. The overall design is minimalist and elegant, with a focus on the central message.

Thank You

The bottom corners of the image are decorated with stylized leaf patterns and abstract shapes in shades of brown, tan, and pink. The text is centered and reads "@reallygreatsite".
